Business Charging Solutions

PULSAR PLUS

Smart and powerful EV charging

Pulsar Plus is our most powerful and compact Level 2 (240V) charging solution for light commercial and multi-unit residential installations. Capable of delivering up to 11.5kW (48A model) of charging power, Pulsar Plus is an affordable and scalable solution for businesses and residential communities.

NEMA Type 4 rated watertight and UL listed, Pulsar Plus is suitable for indoor and outdoor installations. When paired with our lightweight pedestal solution, Pulsar Plus can go wherever you need to add EV charging.

Designed for easy installation, Pulsar Plus can charge any electric car on the market today and is future-ready to handle tomorrow's more powerful EVs. Pulsar Plus can be OCPP-ready and can be integrated into most charger networks.

PULSAR PLUS

Smart EV charging made simple

✓ **Compact design, powerful performance**

Charge up to 96kW (40A) or 11.5kW (48A). Adjustable power from 6A to max rating. Add up to 30-35 miles of range per hour.

✓ **Scalable**

Owners and operators can easily connect multiple chargers and manage their charger networks, growing their charging infrastructure as needed.

✓ **Durable**

UL listed and NEMA Type 4 rated watertight, Pulsar Plus is safe for indoor and outdoor installations.

✓ **Power Sharing**

Connect up to 25 Pulsar Plus chargers to a single electrical circuit and dynamically balance power delivery to connected vehicles.

✓ **Wi-Fi and Bluetooth**

With both Wi-Fi and Bluetooth connectivity, users and charging network operators have multiple ways to manage and control connected chargers.

✓ **Onboard Intelligence**

Manage smart functions—including power sharing, charge scheduling and remote locking/unlocking—even when you can't connect to the Internet

✓ **Network ready**

Available as an option, Pulsar Plus can be OCPP-ready and integrate with a growing number of demand response programs and charging networks.

PULSAR PLUS

Pedestals

Elegant and compact mounting for Pulsar Plus

- ✓ **Single or dual mount**
- ✓ **Multiple power supply ports allow for virtually any wiring or conduit situation**
- ✓ **Optional rain cover available for additional weather protection**

PULSAR PLUS

myWallbox

One platform, multiple ways to access your charger

With Wi-Fi and Bluetooth connectivity, you can use the myWallbox platform to connect and control your chargers and your charging.

- Manage and monitor the status of your EV charging from anywhere
- Set and manage charge schedules
- Remote charger locking and unlocking
- Manage multiple users and multiple chargers
- Real-time charging statistics
- Real-time notifications
- OCPP-capable

PULSAR PLUS

Product Details

General specifications

Dimensions:	7.8" x 7.9" x 3.9" (without cable)
Weight:	4.4 lbs (without cable)
Cable length	25 ft
Connectivity:	Wi-Fi / Bluetooth
User interface:	myWallbox app & portal
Voice control:	Amazon Alexa / Google Assistant

Electrical specifications

Rated current/ charging power:	40A / 9.6kW 48A / 11.5kW
Configurable current:	6A to max rated current
Electrical Safety:	UL 2594, UL 2231
Certification	
EMC Compliance:	FCC Part 15 Class B
Environmental rating:	NEMA Type 4 per UL 50E
